

610120 Mechanical pressure spindle

DESCRIPTION

The mechanical pressure spindle is the centrepiece of every KUKKO puller. This enables a maximum pulling force of 10 tonnes to be achieved. Manual operation of the spindle ensures sensitive control of the pulling process. The fine thread also guarantees perfect power transmission. A reversible spindle tip enables the spindle to be positioned securely both on smooth surfaces and when centring.

RANGE OF APPLICATION

This allows a maximum tractive force of 10 t to be achieved

BENEFIT

- Optimum sliding properties in the thread thanks to special coating
- Ideal adaptation of the spindle to the shaft thanks to double-sided spindle tip
- Bearing-mounted, freely rotating centre point protects the shaft from damage when applying the extraction force
- Extremely durable due to rolled thread
- Including KUKKO special grease

MASTER DATA

GTIN [EAN]	4021176910005
Country of origin	DE
Case material	Tool steel
Series	6
Net weight [kg]	0,12 kg
Package contents	1 piece
Packaging Act	PP 05
Global sales capability given	Yes
