

# 800-626 Mechanical impact shock spindle

## DESCRIPTION

The mechanical impact shock spindle enables easy and controlled removal of particularly tight parts by impact. The spindle also guarantees particularly good sliding properties in the thread. The fine thread ensures ideal force transmission. The exact force required for pulling is generated.

## RANGE OF APPLICATION

For easy and controlled removal of particularly tight parts by impact.

## BENEFIT

- Easy and controlled removal of particularly stuck parts by impact

## MASTER DATA

GTIN [EAN]	4021176969980
Country of origin	DE
Case material	Tool steel
Series	800-626
Net weight [kg]	2,105 kg
Package contents	1 piece
Packaging Act	PAP 21
Global sales capability given	Yes
