

365-200 C-screw clamp, all-steel

DESCRIPTION

The all-steel C-screw clamps from the 365 series are used for resilient elastic clamping of multiple workpieces in trade, industry and workshops. The screw clamp has a trapezoidal spindle for a particularly high clamping force. The 365 series has a toggle handle that enables particularly firm tightening.

RANGE OF APPLICATION

For springy elastic clamping of several workpieces

BENEFIT

- Clamping force up to 15,000 N
- Smooth-running trapezoidal spindles ensure even greater power transmission
- Numerous variants of the clamping width and throat depth of screw clamps enable parts of different sizes to be held in place

OPERATION

- Place the fixed clamping arm on the workpiece to be held and roughly fix it by moving the movable clamping arm
- Tighten the threaded spindle by actuating the handle and thus firmly fix the workpiece

MASTER DATA

GTIN [EAN]	4027474915780
Country of origin	DE
Case material	Tool steel
Series	365
Net weight [kg]	2,265 kg
Package contents	1 piece
Packaging Act	PP 05
Global sales capability given	Yes
