BIG PLAYERS

With power and precision

 KUKKO.COM

KUKKO AXLE

The mobile, hydraulic steering knuckle pin press

COLOSSAL SAFETY

The state-of-the-art kingpin press meets the highest demands of everyday workshop activities.

It delivers maximum functionality when pressing in and pressing out all standard kingpins on the front axles of commercial vehicles.

Maximum safety is guaranteed by the stability and durability of the press.

HIGHEST PRECISION

Use the spindle to adjust the working height to millimeter precision and ensure optimal handling for all difficult mounting conditions.

SIMPLE HANDLING

The axle operates „hands-free“. This means that a pneumatic hydraulic pump helps the user operate it.

This significantly reduces the amount of strength required.

MULTIFUNCTIONAL USE

Thanks to the swivel-mounted and rotatable press frame, precise positioning is ensured.

At the same time, the 360° swivel unit can be used for both pressing in and out.

HYDRAULIK

KUKKO URANOS

The motor conductor for removing and installing motors without limits.

UNIVERSAL ADJUSTMENT

The motor conductor can be used in a number of ways, thus ensuring optimal movement of the incline position when removing and installing motors and engines from vehicles of all types.

READY-TO-USE

The motor conductor does not have to be installed on the device and is immediately ready for use.

LIMITLESS WORK

The endless hand chain is actuated in a flexible manner, thus securing any desired inclined position when removing or installing the motor.

MAXIMUM SAFETY

A sufficient safe distance is always ensured by the hand chain guide in an oscillating swing arm.

The strongest in its class

KUKKO Big Players, overview

KUKKO Axle

Mobile, hydraulic steering knuckle pin press

- Mobile, hydraulic steering knuckle pin press with pneumatic pump drive.
- For pressing steering knuckle pins in and out on the front axles of commercial vehicles.
- The press can be used with axles that are either installed or have been dismantled.
- For quick and easy positioning on the vehicle, the work unit swivels and can be preset.
- Easy positioning with four steering rollers.

PRODUCT INFORMATION

Pin and bush set available as accessories.

| Art.-No. |  mm |  mm |  mm |  mm | max. t |  kg |
|----------------|------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------|--------|--------------------------------------------------------------------------------------------|

KUKKO Uranos

Engine conductor

- With self-locking worm gear and 3-point suspension.
- The hand chain can be operated in all angular positions without impairment.
- The desired incline is securely held by the built-in, self-locking worm gear as soon as the operation of the hand chain stops.
- The large gear ratio of the worm gear, with maximum efficiency, guarantees expeditious handling in all situations.
- A detailed instruction manual is included with each engine conductor.
